PGD ballistic helmets are engineered to meet the highest industry standards. They are designed to withstand some of the most advanced handgun threats in the world. Our ballistic helmets use high-performance aramid fiber from Kevlar, which is made by the leading European ballistic fiber manufacturer Dupont. Our helmets offer greater protection than the standard NIJ standard 0106.01 with an extremely low back face deformation.

\*All five PGD helmet shells share the same material composition; ballistic testing is conducted exclusively on the ARCH model.

### SPECIFICATIONS

A proven high-cut ballistic helmet for military and law-enforcement professionals. Engineered from high-performance ballistic materials to deliver maximum protection with minimal weight.

Mission-ready design with integrated NVG shroud and side rails for seamless mounting of night vision, communication systems, and mission-critical accessories.

Adjustable retention system with energy-absorbing padding ensures a secure, comfortable fit during extended and demanding operations. Certified NIJ Level IIIA ballistic protection with fragmentation resistance (STANAG 2920 / AEP 2920), tested for durability and long-term operational performance. Material: 100% UHMWPE (polyethylene).

EXTREMELY DURABLE

DROP RESISTANT

ANTI-SCRATCH

MADE IN EUROPE

ANTI-FOG

### SPECIFICATIONS

Our PGD ballistic NIJ 3A visor is a critical piece of personal protective equipment designed to provide maximum protection and comfort.

It is tested to the NIJ 3a standard and can withstand handguns and fragments.

The visor fits both our ARCH and MICH helmets, making it a versatile solution for many operational needs.

The visor can be easily flipped up and down as needed, providing flexibility and increased user-friendliness.

The visor weighs only 1300 grams including holders, making it solid and protective without being too heavy.

### BALLISTIC TESTING

- The visor is tested to the NIJ IIIA standard for protection against .44 magnum and 9 mm, and provides fragmentation protection according to STANAG 2920  $V_{50} = 725$  m/s

## MEMORY FOAM PADS FOR PGD HELMETS

### KEY FEATURES

SNUG FIT

EXTREMELY DURABLE

SWEAT-TRANSPORTING MATERIAL

### SPECIFICATIONS

The PGD 10-pad helmet liner features 10 specially designed memory foam pads that adapt to the shape of your head within 2-3 seconds. This innovative memory foam provides a secure, snug fit without creating a tight or uncomfortable sensation.

Upgrading to PGD 10-pad helmet liner offers a number of benefits:

- Memory foam for extra comfort
- Blunt force trauma reducing
- Made of sweat-transporting material
- Mounted very easily with velcro

PGD soft armor solutions are engineered to meet the highest industry standards. We are highly specialized in the manufacturing of soft armor, and we use materials from e.g. US Honeywell; Spectra Shield and Gold Shield to ensure that all of our soft armor solutions are made with the best possible ballistic materials.

All of our solutions undergo thorough testing, according to both NIJ standard 0101.06 and NIJ standard 0101.04 at renowned laboratories such as AITEX in Spain and Element Defense in the United States.

At PGD, all soft armor is manufactured in our own ISO9001:2015 certified factory in Denmark. By controlling the entire production process, we guarantee the highest quality. This also allows us to provide premium products at a significantly more affordable price to our customers.

### RECOMMENDATION FOR USE

Before using the vest you should adjust the cummerbund (velcro straps on the back of the vest according to your waist) and do the same for the shoulder straps which are adjusted with velcro.

To take the vest on/off and attach/detach cummerbund and take the vest on/off above the head.

For correct performance, the garment must be correctly adjusted with the cummerbunds closed and the shoulder straps closed at all times.

Users must be instructed to visually inspect their PPE before every use to ensure it retains protective qualities. Dispose of any damaged items.

The environmental conditions and risks associated with the operator's surroundings must be considered.

### WASHING INSTRUCTIONS

- We recommend handwashing in 30 °C maximum 1x
- Do not bleach, tumble dry or dry-clean
- Do not wash ballistic inserts
- Avoid folding the vest
- Line dry

### SPECIFICATIONS

Fully upgraded ultra durable tactical vest with high levels of adjustability.

Made in full 500 denier Cordura laminate, which is 35-40% lighter than traditional MOLLE.

This offers the best possible mobility to wear over a long period of time. Our laminate fabric is water-resistant, abrasion-resistant and has a high tear resistance for long term use.

The ballistics are made with high quality materials from Teijin and weigh 5.6kg/m<sup>2</sup>.

Features built in front and back pockets for carrying ESAPI hard armor.

7-year ballistic warranty and 2-year warranty on the textile carrier.

OUTSTANDING  
PROTECTION

THIN AND  
COMFORTABLE

MADE IN  
EUROPE

EXTREMELY  
DURABLE

TEMPERATURE  
RESISTANT

LIQUID AND OIL  
RESISTANT

### SPECIFICATIONS

This 2-in-1 stab proof vest protects from striking edged/pointed instruments and blunt objects like baseball bats and police batons, as well as kicks and punches.

It is NIJ 0115.00 level 3 stab proof-/spike proof vest that has been tested for NIJ standard 0115.00 level 3 - 65 joules against both knife and spike (similar to the HOSDB standard KR3 + SP3).

You get a stab proof vest that is up to 50% lighter than similar vests on the market. At the same time, this stab proof vest is the same weight as most NIJ level 1/KR1 stab vests and offering up to 80% more resistance against knife and spike attacks.

It is 2 mm / 0.08in thin and offers indefinite lifespan compared to kevlar's 5-years.

### BALLISTIC TESTING

- NIJ standard 0115.00 level 3 (S1, P1 and Spike at 65 joules)

# PGD CORE PLATE CARRIER

## MODULAR PLATE CARRIER SYSTEM

### KEY FEATURES

**EXTREMELY DURABLE**

**QUICK RELEASE**

**TEMPERATURE RESISTANT**

**MADE IN EUROPE**

### SPECIFICATIONS

The PGD CORE Plate Carrier is a lightweight, modular plate carrier system designed for military and law enforcement use.

Constructed from ORIGINAL 500D Cordura® laminate, it offers high durability, IRR-safe materials, and a low-profile design optimized for mobility and comfort.

The carrier features integrated quick-release systems, AVS-compatible zippers for back panel integration, and a reinforced HDPE skeletal cummerbund for stable load distribution.

- 40 mm ROC buckle or Velcro® shoulder closure options
- Laser-cut MOLLE on cummerbund and rear plate bag
- Velour-lined interior for comfort pad integration
- Optimized for EUD and communication equipment
- Shock cord routing for cable and PTT management
- Designed for excellent weapon handling and shouldering

### PLATE COMPATIBILITY

- SAPI / ESAPI
- Standalone and ICW configurations

# PGD BALLISTIC PLATES

## COMPARISON CHART

Our comparison chart offers a clear overview of 7 ballistic plates, including our B-line, U-line, LW-line, and S-LW-line. It highlights key specs such as weight, thickness, protection level, and materials, making it easy to compare performance across lines. Whether you're looking for maximum protection, ultra-lightweight design, or the best balance between the two, this two page chart helps you find the right plate for your mission.

### KEY FEATURES

**OUTSTANDING BALLISTICS**

**THIN**

**MADE IN EUROPE**

**EXTREMELY DURABLE**

**TEMPERATURE RESISTANT**

PGD ballistic plates are engineered to meet the highest industry standards. All of our hard armor plates are made with full edge to edge protection, meaning you have full coverage to the edge.

NIJ protection levels 3 and 4 are standards for our hard armor plates. We care deeply about your safety, so all our hard armor plates are tested to NIJ standard 0101.04 and 0101.06 at AITEX in Spain and Element Defense in the USA.

\*Plate weight tolerance: +/- 0,1 kg.

\*\*Plate thickness tolerance: +/- 1,5 mm.

### SPECIFICATIONS

Our PGD LW line are low weight standalone plates and are available as a multicurved front plate as well as two sizes of single-curved side plates.

The plates are 100% HPPE (High performance Polyethylene). This ensures high protection capabilities against multiple hits.

The plate is very drop resistant and it's covered with a liquid-repellent Cordura cover, which protects the ballistic properties against water, oil and similar liquids.

The plate has a thickness of 28 mm.

7-year ballistic warranty.

### KEY FEATURES

**SUPER LOW WEIGHT**

**EXTREMELY DURABLE**

**EXTREMELY THIN**

**TEMPERATURE RESISTANT**

**MADE IN EUROPE**

**LIQUID AND OIL RESISTANT**

### SPECIFICATIONS

Our PGD S LW line offers premium, ultra-low-weight multi-curved plates designed for use in conjunction with NIJ IIIA soft armor.

The plate is made with high-end polyethylene and is manufactured under extreme pressure.

The plate is very drop resistant and it's covered with a liquid-repellent Cordura cover, which protects the ballistic properties against water, oil and similar liquids.

At only 15 mm thick, it provides superior protection in an incredibly slim profile.

7-year ballistic warranty.

### KEY FEATURES

**OUTSTANDING BALLISTICS**

**EXTREMELY DURABLE**

**THIN**

**TEMPERATURE RESISTANT**

**MADE IN EUROPE**

**LIQUID AND OIL RESISTANT**

### SPECIFICATIONS

Our PGD U-Line IV ICW is a premium plate and it is available as a multicurved front/back plate.

The plate is made of monolithic Silicon Ceramic from Saint Gobain and aramid backing. This enables a good protection-to-weight ratio and edge-to-edge ceramics.

The plate is covered with a liquid-repellent Cordura cover, which protects the ballistic properties against water, oil and similar liquids.

The plates have a thickness of just 25 mm.

7-year ballistic warranty.

### SPECIFICATIONS

Our PGD BERSERKER IV is an economical high value for money standalone single-curved plate.

It is a multi-hit rated AL203 Ceramic plate with polyethylene backing. This allows for the very high protection levels at an affordable price.

The plate is covered in a very thin drop resistant foam and a liquid-repellent Cordura cover, which protects the ballistic properties against water, oil and similar liquids.

The plate has a thickness of 22 mm.

7-year ballistic warranty.

### BALLISTIC TESTING
